

Module Specification

Module Title: Specialist Study Composition 2 (Classical)

Module code:	X_CLS5C002R	NQF level:	Level 5
Credit value:	30 credits	Semester of study:	1 and 2
Module type:	Compulsory	Pre-requisites:	None
Available to:	BA (Hons) Music (Classical)		

Module overview

Students will be expected to show a greater awareness of their musical identity and be able to focus and apply this in particular ways, again with a sense of the context of their work relative to current or recent developments in the discipline. The emphasis will be on exploring more complex and sophisticated musical language as well as more complex and sophisticated musical forms, resulting in a more intensive compositional output. Projects undertaken by students should ideally involve a performance of their work with a recorded outcome constituting the final product.

Aims

This module is designed to continue the support of the students' development in composition practice. Recognising the importance of continual development, through one-to-one teaching opportunities, students will have opportunities to develop their emerging musical voice to prepare them for level 6.

The module aims to:

1. Enable students to further develop their understanding of the techniques and skills of musical composition and/or arrangement, showing a technical command in their execution.
2. Enable students to apply appropriate expression, creativity and presentation to their compositions.
3. Encourage students to realise and develop their emerging musical voice.

Learning outcomes

On successful completion of this module, students will be able to:

1. Critically analyse the compositional process and resulting piece of music.
2. Compose and/or arrange and present music with a secure technical command of, and fluency in, chosen compositional idioms.
3. Demonstrate refined stylistic awareness in the creation of original music, and exercise significant judgment in the organisation of a portfolio.

Learning and teaching methods

One to one tuition facilitates a developmental process over two semesters. It is designed to build upon existing skills in technique and musicianship in order to establish strong composition and arrangement skills with the aim of developing expression, creativity and technique.

Workshops/seminars are designed to support the student's one-to-one activity and place their specialist study in the wider context of technical considerations, artistic expression and critical insight. This will inform their technical assessment and portfolio submission (which may be structured as a performance or traditional composition portfolio depending on the pathway they are undertaking).

Contact hours and directed study (over semesters 1 and 2)

Delivery type	Student hours
Indicative hours for learning and teaching activities	40 hours
Indicative hours of directed study	260 hours
Total hours (100hrs per 10 credits)	300 hours

Opportunities for formative feedback

Within the individual tuition process students receive verbal feedback regarding their progress on a weekly basis as part of an ongoing development process. This is the same for Composition in Context seminars/workshops (FA1) which are designed to be group focused therefore offering possibilities for peer and tutor feedback.
